

CLEANING INSTRUCTIONS FOR NEW AND OLD LEADED GLASS PANELS

Ambrosia Glassworks Co., Inc.
Thousand Oaks, California 800-899-2420
contact@ambrosiaglassworks.com

Ambrosia Glassworks recommends using ammonia free cleaning products only. Ammonia and other harsh cleaning products will chemically react with the lead to cause a mild form of deterioration and/or erosion to the surface which will result in discoloration of the lead and removal of colored finish. The glass is impervious to any products except acid and harsh cleaning abrasives.

Dry clean your leaded glass project for best results. Use dry cotton swabs (Q-Tips) and soft paper towels.

Minimize cleaning to dirty areas only. If necessary, apply cleaning product to the cotton swab or paper towel directly. Try to Clean dirty areas i.e. (Fingerprints, Smudges, etc.) only without smearing the smudge throughout the whole panel.
